

OBSERVE VAN

This reliable and economical winter van tire is designed to keep business moving, whatever the conditions. In cold, wet wintry conditions or even in snow, Observe Van tires offer unrivalled mobility.

Observe van tires are hard wearing. Nano Balance Technology has been employed to develop enhanced compounds. These, combined with a strengthened casing and innovative tread block design, result in a longer lasting tire.

Speed index R, S, T and H. 14 - 17 inch.

TREAD PATTERN FEATURES

Double Zigzag Rib

- Improves wear performance with high rib stiffness
- Edge effect on snow surface.

Large Shoulder Block

- Improves wear performance with high block stiffness

Step Edges

- Enhances traction performance in snow conditions

3D Multi-wave Sipes

- Suppress the movement of the block, thus providing good cornering performance

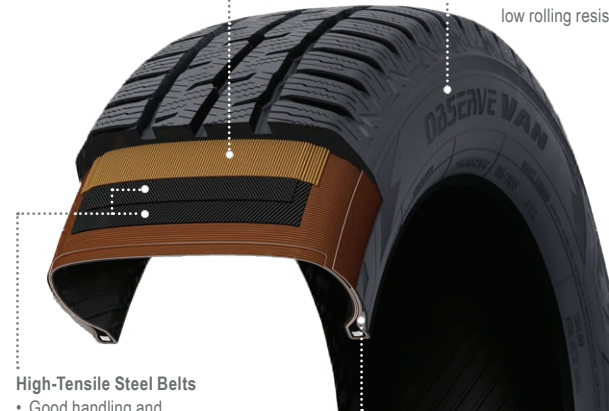

CONSTRUCTION TECHNOLOGY

Spiral-wound Cap Ply

- Good handling stability
- Improved uniformity

High-hardness and low fuel efficiency Sidewall Compound

- Excellent handling and low rolling resistance

High-Tensile Steel Belts

- Good handling and directional stability

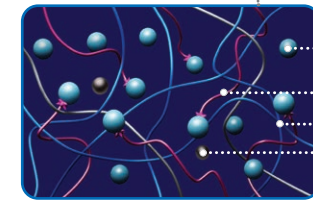

High Stiffness Polyester Casing

- Good handling and cornering stability

TREAD COMPOUND

New Super Active Polymer & Snow Polymer improves level of wet grip, low rolling resistance and snow performance.
