

PROXES CF2

The successor of the Proxes CF1 benefits from improved tire construction and a new, full-silica tread compound. Partly thanks to these, the tire has a longer tire life, better wet performance and lower fuel consumption.

Proxes CF2 is the right choice for drivers looking for a high performance and safe tire for medium to high powered cars.

13 - 18 inch. Speed indices H, V and W.

Tread Pattern Features

- 1 OPTIMISED PATTERN STIFFNESS**
 Low rolling resistance.
 Increased wear life.
 Improved wet and dry braking.
- 2 SHOULDER RIB BLOCK**
 Low noise production.
- 3 FOUR WIDE EVACUATION GROOVES**
 Excellent wet braking performance (B).
 Excellent water clearance.
 Outstanding safety and control in potential aquaplaning situations.
